NUMBER 1: JANUARY 1994

Editorial 1

On reducing ambiguity in the interpretation of transient electromagnetic sounding data. *M. Goldman, A. du Plooy and M. Eckard* 3

Seismic velocities in fractured rocks: an experimental verification of Hudson's theory. *S. Peacock, C. McCann, J. Sothcott and T. R. Astin* 27

Comment on 'Aspects of 1D seismic modelling using the Goupillaud principle' by Evert Slob and Anton Ziolkowski. *Edward Szaraniec* 81

Reply to Comment on 'Aspects of 1D seismic modelling using the Goupillaud principle' by E. Szaraniec. *Evert Slob and Anton Ziolkowski* 85

Comment on 'Aspects of 1D seismic modelling using the Goupillaud principle' by Evert Slob and Anton Ziolkowski. *Dan Loewenthal* 89

Reply to Comment on 'Aspects of 1D seismic modelling using the Goupillaud principle' by Dan Loewenthal. *Anton Ziolkowski and Evert Slob* 91

Comment on 'Some remarks on the behaviour of the magnetotelluric phase' by G. Fischer. *Xiaobo Li and Laust B. Pedersen* 93

Reply to Comment on 'Some remarks on the behaviour of the magnetotelluric phase' by Xiaobo Li and Laust B. Pedersen. *G. Fischer* 97

NUMBER 2: FEBRUARY 1994

Migration to multiple offset and velocity analysis. *R.-G. Ferber* 99

A gravimetric 3D Global inversion for cavity detection. *A. G. Camacho, R. Vieira, F. G. Montesonos and V. Cuéllar* 113

The fast Hankel transform. *Adel A. Mohsen and E. A. Hashish* 131

Definitions of apparent resistivity for the presentation of magnetotelluric sounding data. *A. T. Başokur* 141

The relationships between the velocities, attenuations and petrophysical properties of reservoir sedimentary rocks. *A. I. Best, C. McCann and J. Southcott* 151

NUMBER 3: APRIL 1994

A study of the geoelectrical properties of peatlands and their influence on ground-penetrating radar surveying. *Brian D. Theimer, David C. Nobes and Barry G. Warner* 179

Layer-stripping reverse-time migration. *Ruey-Chyuan Shih and Alan R. Levander* 211

Relation of *in situ* resistivity to water content in salt rocks. *U. Yaramanci* 229

Compound events decomposition and the interaction between AVO and velocity information. *Umberto Spagnolini* 241

A method to estimate the total magnetization direction from a distortion analysis of magnetic anomalies. *Maurizio Fedi, Giovanni Florio and Antonio Rapolla* 261
Errata 275

NUMBER 4: MAY 1994

Tectonic modelling in the Bjørnøya West Basin of the Western Barents Sea. *Guojiang Liu* 277
Experimental and finite difference modelling of borehole Mach waves. *Ningya Cheng, Zhenya Zhu, C. H. Cheng and M. N. Toksöz* 303
Using the pseudospectral technique on curved grids for 2D acoustic forward modelling. *Per Nielsen, Flemming If, Per Berg and Ove Skovgaard* 321
Shallow fault location in coal measures using offset Wenner resistivity profiling. *B. A. Hobbs and A. M. Reading* 343
Elastic modelling on a grid with vertically varying spacing. *Cord Jastram and Ekkehart Tessmer* 357

NUMBER 5: JULY 1994

2D finite-difference elastic wave modelling including surface topography. *Stig Hestholm and Bent Ruud* 371
Upward continuation of potential fields from a polyhedral surface. *M. Ivan* .. 391
A physical approach to computing magnetic fields. *Peter Furness* 405
Two-level magnetovariational measurements for the determination of underground resistivity distributions. *D. Patella and A. Siniscalchi* 417
True-amplitude migration of 2D synthetic data. *C. Hanitzsch, J. Schleicher and P. Hubral* 445
AVO signatures of actual and synthetic reflections from different petrophysical targets. *A. Mazzotti, A. M. Melis, G. Ravagnan and G. Bernasconi* 463
Normal moveout in focus. *Eric de Bazelaire and Jean Rene Viallix* 477
On small-scale near-surface distortion in controlled source tensor electromagnetics. *W. Qian* 501
Comment on 'Simultaneous vibroseis recording' by J. E. Martin and C. W. M. Bacon. *Lucio Deluchi* 521
Reply to Comment on 'Simultaneous vibroseis recording' by L. Deluchi. *J. E. Martin* 523
Comment on 'Three-dimensional interpretation of multiple-source bipole-dipole resistivity data using the apparent resistivity tensor' by H. M. Bibby and G. W. Hohmann. *Xiaobo Li and Laust B. Pedersen* 525
Reply to Comment on 'Three-dimensional interpretation of multiple-source bipole-dipole resistivity data using the apparent resistivity tensor' by X. Li and L. B. Pedersen. *H. M. Bibby* 527

Comment on 'Three-dimensional interpretation of multiple-source bipole-dipole resistivity data using the apparent resistivity tensor' by H. M. Bibby and G. W. Hohmann. *Dariu Doicin* 531
Reply to Comment on 'Three-dimensional interpretation of multiple-source bipole-dipole resistivity data using the apparent resistivity tensor' by D. Doicin. *H. M. Bibby*. 537

NUMBER 6: AUGUST 1994

Backus averaging, scattering and drift. *M. S. Sams and P. R. Williamson* 541
Inversion of reflection seismograms by differential semblance analysis: algorithm structure and synthetic examples. *William W. Symes and Michel Kern* 565
Radar experiments in isotropic and anisotropic geological formations (granite and schists). *Sylvie Tillard* 615
Sign-change correction for prestack migration of P-S converted wave reflections. *A. H. Balch and Cemal Erdemir* 637
An analytic signal approach to the interpretation of total field magnetic anomalies. *Shuang Qin* 665
Using fractal crustal magnetization models in magnetic interpretation. *M. Pilkington, M. E. Gregotski and J. P. Todoeschuck* 677
Pore pressure profiles in fractured and compliant rocks. *Özdoğan Yilmaz, Richard C. Nolen-Hoeksema and Amos Nur* 693

NUMBER 7: OCTOBER 1994

Ground penetrating radar sounding of a temperate glacier; modelling of a multilayered medium. *Florence Nicollin and Wlodek Kofman* 715
Line integrals of potential field data. *M. Ivan* 735
Resistivity inversion of cross-hole and borehole-to-surface EM data using axially symmetric models. *Yutaka Sasaki, Koichi Matsuo and Koichi Yokoi*. 745
Cost-effective 3D one-pass depth migration. *A. Sollid and B. Arntsen* 755
Cased borehole effects on downhole seismic measurements. *Chengbin Peng, Chuen Hon Cheng and M. Nafi Toksöz* 777
Resistivity measurements on the sea bottom to map fracture zones in the bedrock underneath sediments. *O. B. Lile, K. R. Backe, H. Elvebakk and J. E. Buan* 813
Gravity interpretation of sedimentary basins with hyperbolic density contrast. *C. Visweswara Rao, A. G. Pramanik, G. V. R. K. Kumar and M. L. Raju* 825

NUMBER 8: NOVEMBER 1994

Location of secondary faults from cross-correlation of the second vertical derivative of gravity anomalies. *Hualin Zeng, Qinghe Zhang and Jun Liu* 841
The potential of a noise-reducing antenna for surface NMR groundwater surveys in the earth's magnetic field. *D. V. Trushkin, O. A. Shushakov and A. V. Legchenko* 855
An airborne tensor VLF system. From concept to realization. *Laust B. Pedersen, Wei Qian, Lars Dynesius and Ping Zhang* 863
Transversely isotropic media equivalent to thin isotropic layers. *Michael Schoenberg* 885
Statistical analysis of non-stationary voltage recordings in geoelectrical prospecting. *V. Lapenna, M. Macchiato, D. Patella, C. Satriano, C. Serio and V. Tramutoli* 917
Inversion for seismic anisotropy using genetic algorithms. *Steve Horne and Colin MacBeth* 953
Velocity model updating using image gathers. *Wietze Eckhardt* 975
Comment on 'Definitions of apparent resistivity for the presentation of magnetotelluric sounding data' by A. T. Başokur. *L. Szarka* 987
Reply to Comment on 'Definitions of apparent resistivity for the presentation of magnetotelluric sounding data' by L. Szarka. *A. T. Başokur* 989
